Closed-sale behavior

How transactions are clearing

Price Band	Median Sale	Sold $/SF	DTC	Sale / Last List	Cash	Cash Share
$0-$499K	$333,500	$218.10	23	99.5%	3	25.0%
$500K-$749K	$617,500	$228.35	33.5	98.0%	4	18.2%
$750K-$999K	$788,000	$294.31	33	97.0%	1	20.0%
$1M-$1.99M	$1,750,000	$302.49	10	101.0%	0	0.0%
$2M-$3.99M	N/A	N/A	N/A	N/A	0	N/A

Higher price bands are based on smaller transaction samples and should be read cautiously.

MLS Listing Outcomes

What the outcomes show

Observed MLS listing outcomes are not probabilities and may include more than one record for the same property. Among price bands with sufficient sample depth, the highest share of closed outcomes was 92% below $500,000, followed by 92% in the $500,000 - $749,999 range. At $2M-$3.99M, of 3 observed outcome records, 0 closed, 2 expired and 1 was canceled. With only 3 records, that result should be treated as a factual observation, not a failure rate or a prediction of future listing outcomes.

Methodology / Data notes

For this report, Real Buyers represent closed MLS listings with a valid Close Date within the inclusive report period.

The report uses 13 months of closed-sale data for full-period statistics and monthly trend context. Months of Supply uses the monthly pace of Real Buyers in the latest 12 complete calendar months within that 13-month window.

Market Balance classifications use the DANHOLM COLLECTION framework centered on a 6.0-month balanced-market benchmark and are derived from unrounded Months of Supply.

Contiguous empty price bands below the lowest occupied band and above the highest occupied band are omitted from presentation; internal zero bands remain visible.

MLS Listing Outcomes summarize observed SLD, EXP, and CAN records; they are not probabilities and may include more than one record for the same property.

Current Listings include only records with strict ACT status; pending statuses are reported separately.

Months of Supply equals ACT listings divided by that monthly pace (ACT / monthly pace).

Price bands use lower-inclusive and upper-exclusive boundaries; the final $10,000,000+ band is open-ended.

Medians ignore missing or invalid values and average the two middle observations for even samples.
